# Hudson Silva Oliveira

Frontend Developer Sênior | UI/UX Sênior | TypeScript | JavaScript | Angular | React

Araguaína, Tocantins, Brazil

## Summary

I've been working with graphic design, interface design, user experience, project management, and software development for over 15 years now.

With a focus on web development, I've participated in dozens of projects, from concept to implementation, spanning scopes from static pages to complex and scalable SaaS platforms.

During this time, I've also gained experience in digital marketing, SEO, product launches, content creation, documentation, and user support.

I really enjoy the creative aspect of this line of work, creating value for people and companies through solutions that solve real problems.

---

## Experience

### Estúdio MD3

Product Manager, Software Engineer, UI/UX Designer and Front-end Developer

March 2012 - Present (12 years 2 months)

Araguaína, Tocantins, Brasil

I've been running my own small business since 2012, serving clients from various industries and of different sizes. I've participated in the development and delivery of dozens of projects, ranging from simple webpages to complex and scalable softwares.

Roles and responsibilities:

- Requirements analysis, project planning, interface design, user experience, front-end development, monitoring, user training, and support.

Key accomplishments:

- Delivered dozens of websites for companies from various sectors.
- Developed a custom CMS, which evolved into a scalable software focused on educational institutions, used for nearly 10 years by more than 300 users.
- Developed a SPA for pasture and livestock management on farms.
- Developed a SPA for mapping startups in Tocantins (SEBRAE).
- Developed a SPA for Digital Menu integrated with WhatsApp.
- Developed a SPA for contract management in companies, with intelligent filters and automated alert systems.

Languages, frameworks, and tools:

JavaScript, Angular, React, Astro, Ionic, HTML, CSS, SASS, Tailwind, Figma, ASP.NET, Azure DevOps, DataDog, Sentry.

Additional information:

During my journey, I also gained experience in graphic design, digital marketing, SEO, support, documentation, and all the administrative tasks related to running a business.

## ESEA Escolas

Teacher

August 2012 - November 2013 (1 year 4 months)

Araguaína, Tocantins, Brasil

Basic computer science teacher.

## Rensoftware Tecnologia em Sistemas

Software Developer

October 2010 - March 2012 (1 year 6 months)

Araguaína, Tocantins, Brasil

I worked on the development of a desktop application designed to help teachers manage and create exams, with a focus on organizing questions and their answer choices in a random order.

Technologies:

Delphi and Firebird database.

Additional information:

I also worked on importing databases between different applications and creating customized reports.

## Studio Preview

## Web Designer and Graphic Designer

March 2009 - October 2010 (1 year 8 months)

Araguaína, Tocantins, Brasil

I worked on the development of websites and a content management system. Additionally, my responsibilities included conducting interviews, gathering requirements, and designing projects for each client.

Key accomplishments:

- I developed a service order management system for the company itself, which was used for over 12 years.

Languages and tools:

HTML, CSS, Javascript, ASP.NET (Front-end), PHP, MySQL, Photoshop, Corel Draw.

## UNITPAC

Web Designer and Graphic Designer

2007 - March 2009 (2 years)

Araguaína, Tocantins, Brasil

I worked in the Communication and Marketing Department of the same institution where I completed my undergraduate and graduate studies.

I joined as an intern, photographing events, creating graphic designs, and posting content on the college's website. Eventually, because of my field of study, I began developing supplementary pages and "microsites." This progressed to the point where I led the project to create a new website, where I also worked on the design and development of the page and the content management system.

Languages and frameworks:

HTML, CSS, JavaScript, ASP.NET (Front-end).

---
